

Running your Tutti night, from sign-up to podium

Everything to do, in order: create your account, book, connect the TV, choose who hosts, and get your guests playing, blind test and quiz.

1. Create your account

- 1 Go to **tuttiparty.app**, click **Démarrer une partie** (start a game). Direct address: **tuttiparty.app/auth/signup**.
- 2 Fill in **First name**, **Last name**, **Email** and **Password** (at least 8 characters), tick the terms of use, then **Create my account**.
- 3 **The account is active straight away**: no approval to wait for. You land directly on **Réserver une partie** (book a game).

Only the organiser creates an account. **Players don't need one**: they scan a QR code on the night.

2. Book your slot

- 1 In the menu, open **Réserver une partie** (book a game).
- 2 A night is already suggested: **next Friday, 8 PM → 11 PM**. Change the day in one tap (tonight, tomorrow, Friday, Saturday) and the length (2, 3 or 4 h), or set the times yourself, from one to six hours. A **free game code** (TUTTI-XXXX-XXXX)? Tap "J'ai un code partie offerte ou un message".
- 3 The **price appears as you choose**: hourly, prorated to the minute, with an evening rate on Friday and Saturday from 6 PM.
- 4 Click **Réserver et payer** (book and pay): card payment on Stripe's secure page, invoice with VAT provided. **The slot is confirmed the moment you pay**.

Launch offer • -50% — until 31 October 2026 every hour is half price: €4 per hour on weekdays, €7.50 on Friday and Saturday night. The full price stays visible, struck through, next to the discounted one.

Réserver une partie

Choisis ton créneau et envoie ta demande. Nous la validons, puis tu règles en ligne. Le jour J, tu ouvres ta partie depuis ton compte jusqu'à 30 min avant le début.

The booking screen. This page is in French only for now.

3. On the day: start the game

On the dashboard, the **Your game today** card appears. The start button becomes active **30 minutes before** the slot and stays active until it ends.

Choose the game: ► **Start the blind test** or ► **Start the quiz**. One click opens the console with the QR code.

YOUR GAME TODAY

jeudi 24 septembre, 08:41 → 11:41

▶ ***Start the blind test***

▶ ***Start the quiz***

[Other settings \(teams, animator...\)](#)

Two buttons: blind test or quiz.

Just above the start buttons, two choices as big buttons: **Who hosts?** (Everyone plays / With an animator) and **How players answer** (Voice and keyboard / Keyboard only). The game starts solo and in French. For teams or English, **Other settings (teams, animator...)** opens the full form:

Who hosts

Everyone plays, or With an animator (see below).

Answers (blind test)

Voice + keyboard, or keyboard only for a night without microphones.

Solo or teams (blind test)

In teams, from 2 to 15 teams. The quiz always runs individually.

Language

French or English.

New blind test

HOW ARE WE PLAYING?

✓ Everyone plays

One player runs the game from their phone. Nobody sees the answers or the upcoming tracks. Best for parties at home, birthdays, hen/stag nights.

With an animator

One person runs the game from the iPad/Mac, sees the answers and adjusts as needed, the others play. Best for bars, events, sessions with a dedicated host.

HOW PLAYERS ANSWER

✓ Voice and keyboard

Players buzz in and say their answer. The keyboard stays available for those who prefer typing.

Keyboard only

No voice buzzer, no microphone prompt: players type their answer. Handy in a noisy room.

GAME NAME (OPTIONAL)

Ex: Marc's b-day Apr 29

Helps you find this game in history. Leave empty if you don't need it.

GAME MODE

Solo

Teams

Each player plays for themselves.

DEFAULT LANGUAGE

Full settings for a blind test.

4. Who hosts? Pick the right mode

Everyone plays

One player runs the game from their phone. Nobody sees the answers in advance. **Best for:** a night with friends, a birthday, New Year's Eve.

With an animator

One person runs it, sees the answers and adjusts points; everyone else plays. **Best for:** a big group, a night you've announced.

Every connected player has a **role** you can change with one tap in the console:

Player

Plays, does not host.

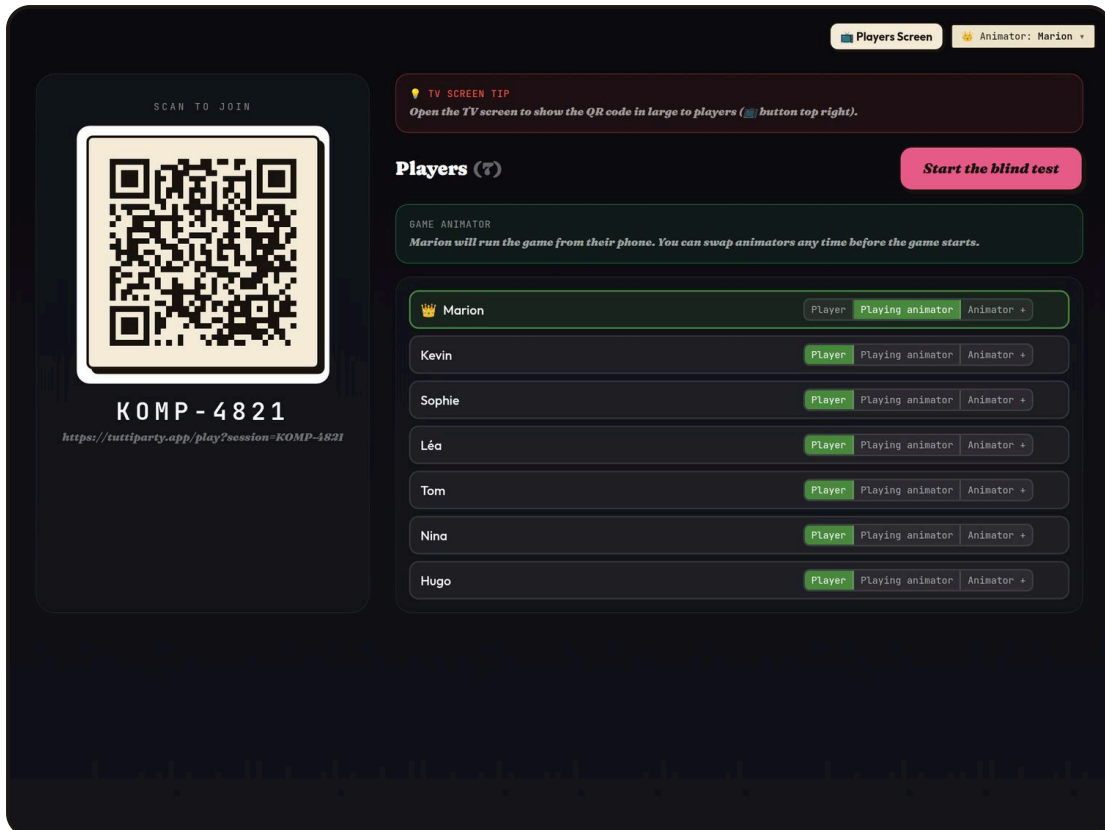

Playing animator

Runs the game from their phone but **doesn't see answers before the reveal**: they can play.

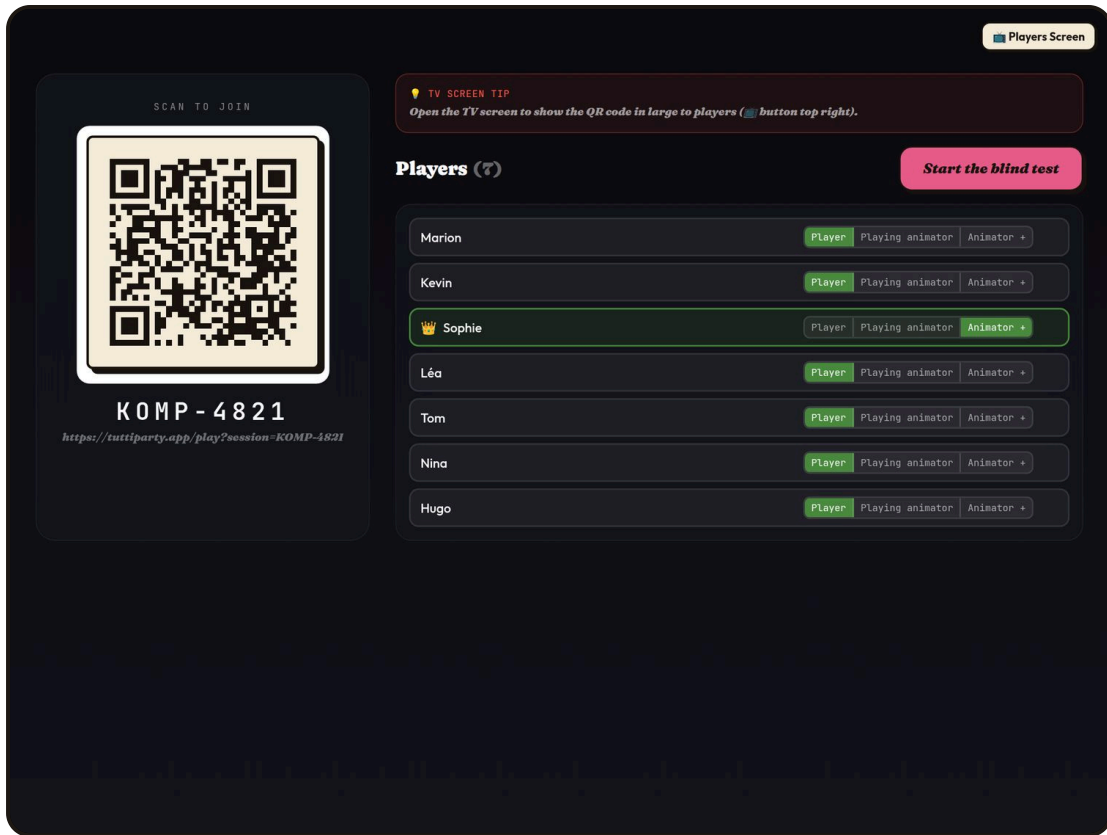

Animator +

Runs the game and **sees answers in advance**. Give it to someone who isn't playing.

Check before you start — look at the roles in the player list. Only give **Animator +** to the person who isn't playing: they see the answers.

Everyone plays: Marion is the Playing animator.

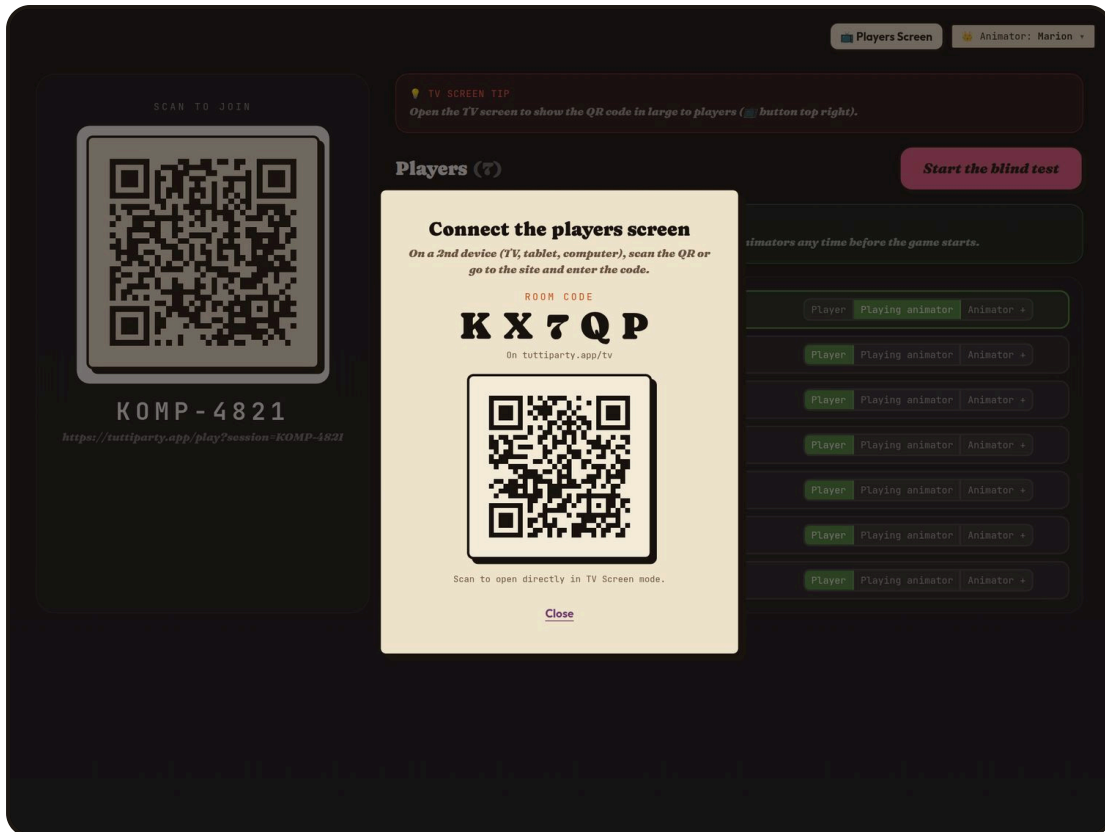

With an animator: Sophie is Animator +.

Top right, the **Animator: ...** badge shows who holds the remote. If it reads “**Nobody holds the remote**” in red, pick someone, otherwise the game can’t move on.

5. The TV: three ways to connect it

In the console, tap 📺 **Players Screen**: a window shows a 5-character **room code** and a **QR code**.

The room code and the QR code.

1 • A second screen connected to the console

On the iPad, with the Tutti app: plug a screen in over USB-C, or start AirPlay mirroring to an Apple TV. The players screen appears **on its own** on that screen, while you keep the console on the iPad.

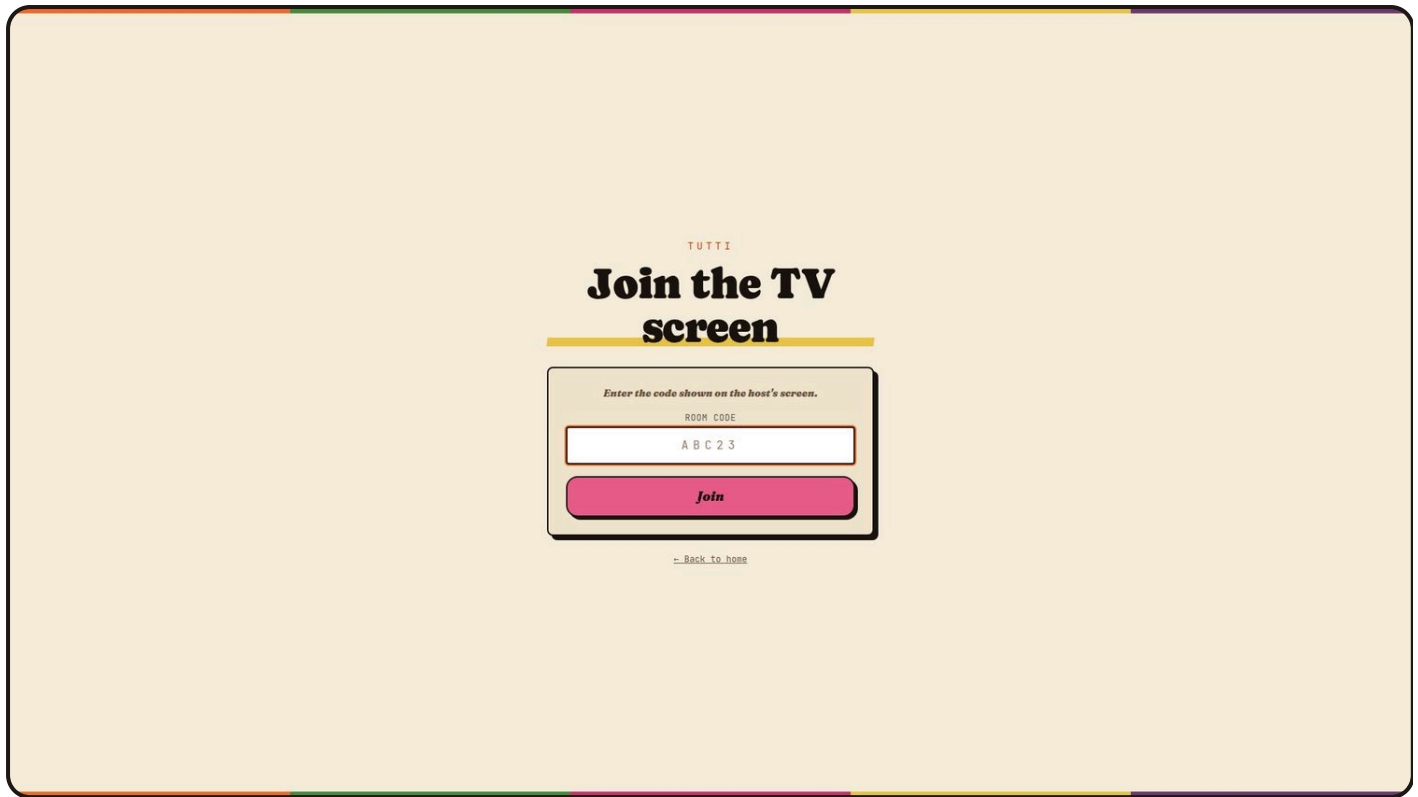

On a computer: in the “Players Screen” window, click **Open here (new window)**, drag that window onto the screen connected by HDMI (or shared over AirPlay) and make it full screen.

2 • The QR code, with a second device

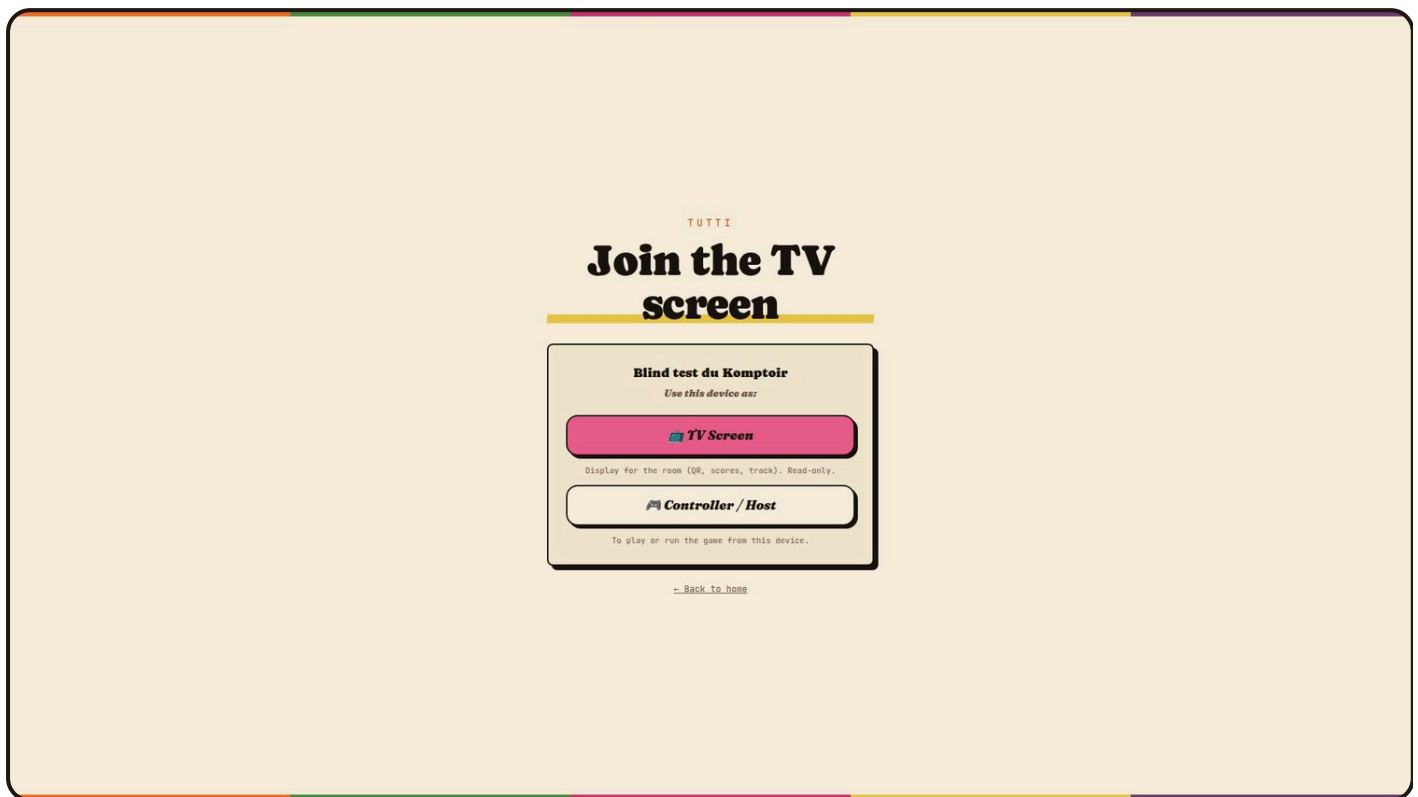

Scan the QR code with an **iPad, tablet or phone**: the page opens, choose **TV Screen**. Then connect that device to the TV (HDMI or AirPlay), or place it where everyone can see it.

3 • The address and the code, on the TV or a computer

On a **smart TV**, a computer or a tablet: open the browser, go to **tuttiparty.app/tv**, type the room code, then choose **TV Screen**.

tuttiparty.app/tv: type the room code.

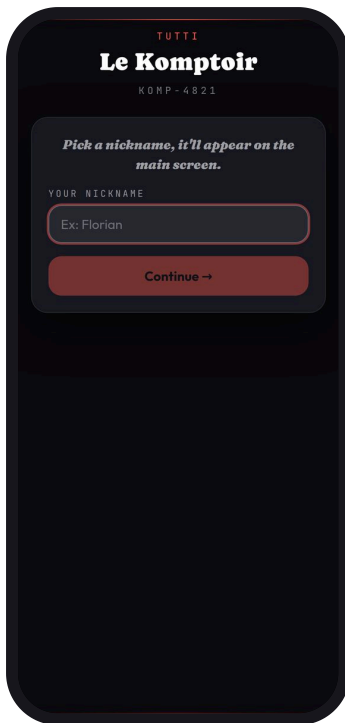

Then choose “TV Screen” or “Remote / Animator”.

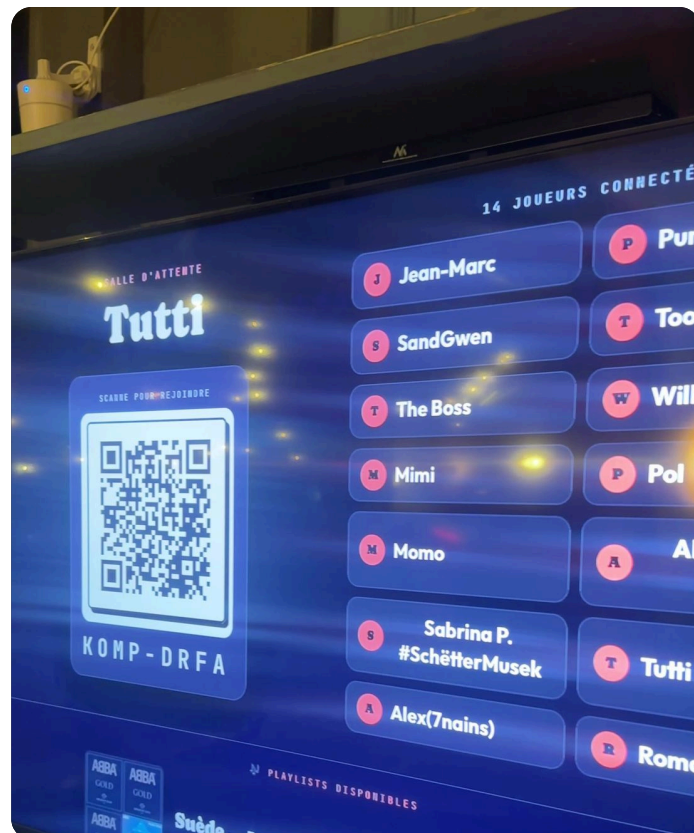

Tip: if you mirror a phone or an iPad over AirPlay, keep it charging and turn off auto-lock.

6. Players join

- 1 They scan the QR code on the TV (or go to tuttiparty.app/play and type the code).
- 2 They pick a nickname, and a team if you play in teams.
- 3 If the game is **voice**, their phone asks for microphone access: **they must accept**, otherwise they can only answer with the keyboard.

Picking a nickname.

For real, on 9 October: nicknames appear on the TV as players join.

While waiting, players can tap **Browse playlists** on their phone and suggest some. In the console, the **Playlists requested by players** list shows the most requested ones (×2, ×3...). You decide.

7. The blind test

Pick a playlist and start the round: **15 tracks** per round. Each track plays in three moments:

PHASE 1 – COMPETITION

Everyone listens. Players hit the buzzer and answer by voice or keyboard.

PHASE 2 – LATECOMERS

As soon as one player finds it, the others have **10 seconds** to find it too.

PHASE 3 – FESTIVE

Buzzers switch off, the music keeps playing. Phones that didn't find it show **"Sing and dance!"**.

The screenshot shows the Tutti app interface during a game. The main screen is dark with a large circular timer in the center displaying the number 6 and the word "seconds". Above the timer, the text "MORE" is visible. The top left corner shows the "Tutti" logo and "ROUND 1 5 / 26 VARIÉTÉS FRANÇAISES ANNÉES 80". The top right corner indicates "PHASE 2 – LATECOMERS". On the right side, there are two panels: "RANKING ON THIS TRACK" and "LIVE RANKING".

RANKING ON THIS TRACK

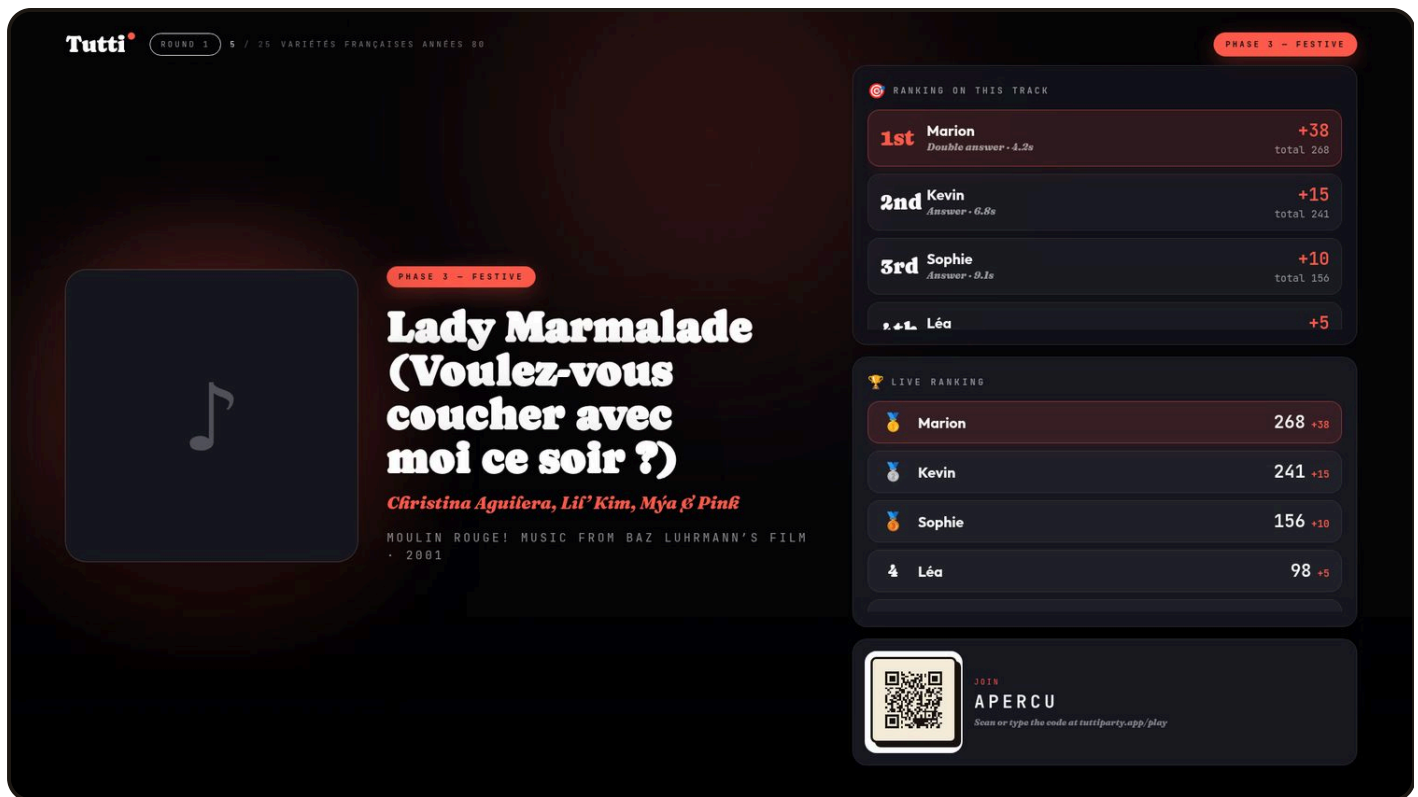

1st	Marion	+38
	Double answer - 4.2s	total 268
2nd	Kevin	+15
	Answer - 0.8s	total 241
3rd	Sophie	+10
	Answer - 0.1s	total 156

LIVE RANKING

1	Marion	268 +38
2	Kevin	241 +15
3	Sophie	156 +10
4	Léa	98 +5

At the bottom right, there is a QR code and a section titled "JOIN APERCU" with the text "Scan or type the code at tuttiparty-app/play".

During the track.

At the reveal: title, artist and points.

Points

POSITION	1ST	2ND	3RD	4TH	5TH	6TH	7TH +
POINTS	20	15	10	5	3	3	2

☐ **Speed bonus**, first player only: 10 minus the seconds taken (found in 3 s → +7).

☐ **Double answer**: artist and title in the same answer earn +10.

☐ **In teams**: only each team's first correct answer counts.

What to tell players before you start

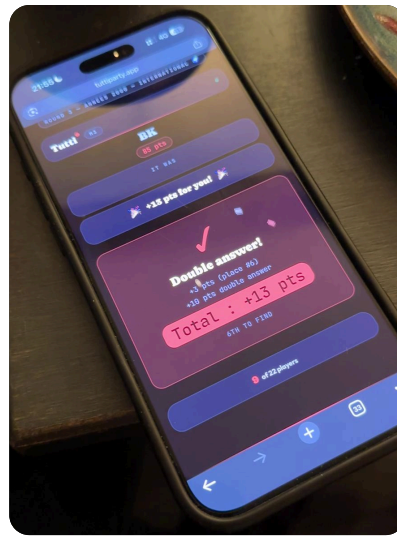

☐ Give the **artist**, the **title**, or both.

☐ Speak into the **microphone at the bottom of the phone**, not towards the screen.

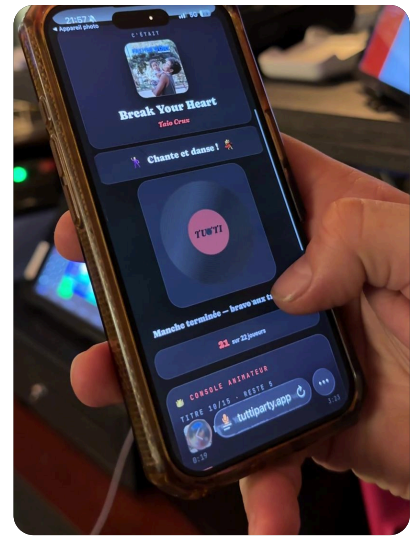

☐ Speak **normally**, don't shout, and **one person at a time**.

The buzzer.

Double answer: the bonus shows up.

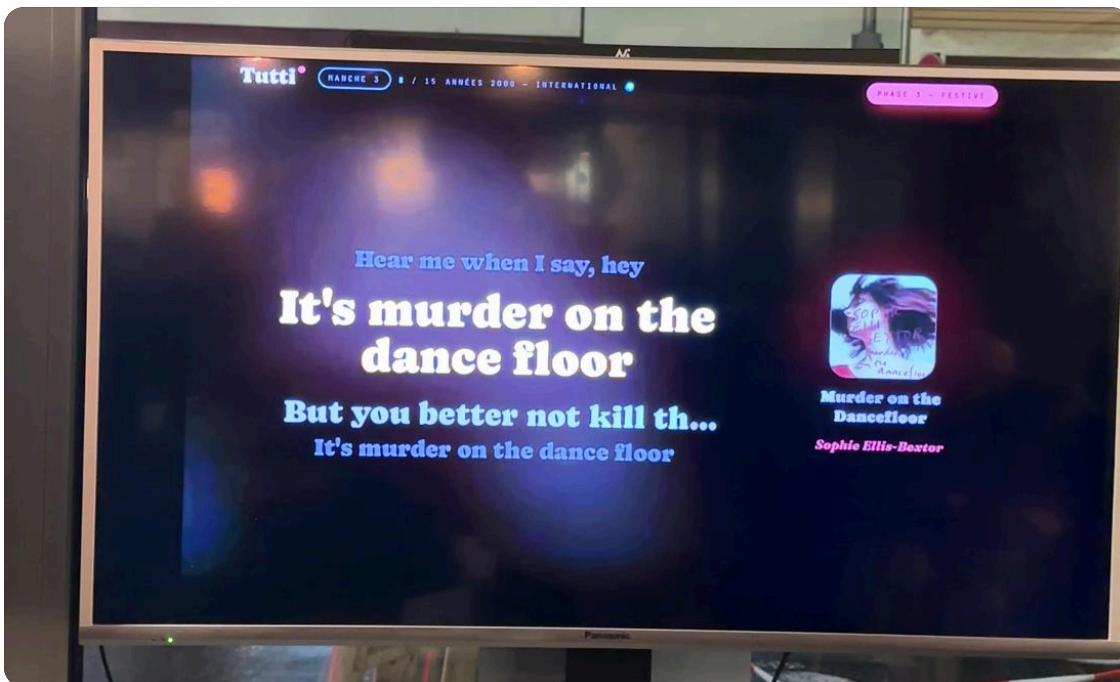

Festive phase: "Sing and dance!".

Lyrics on the TV

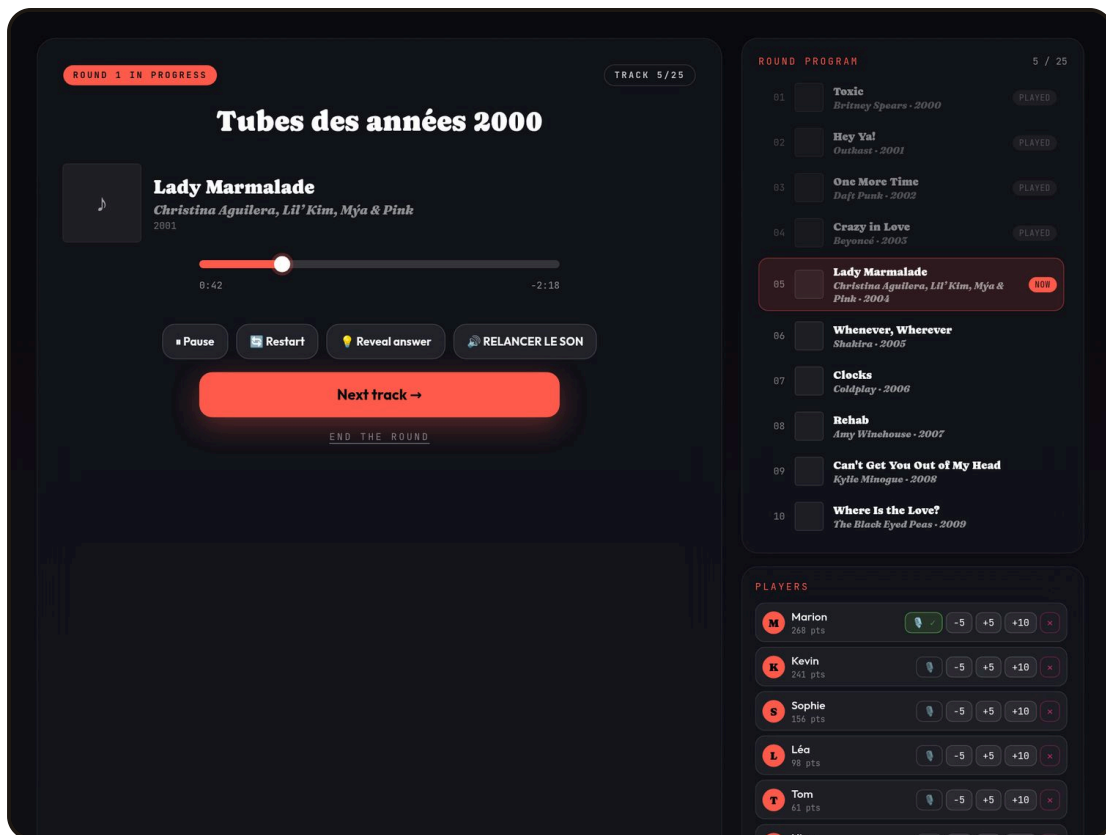

After the reveal, if the track's lyrics are available, the **Lyrics** button shows them large on the TV. Everyone sings.

REAL PHOTO

The console

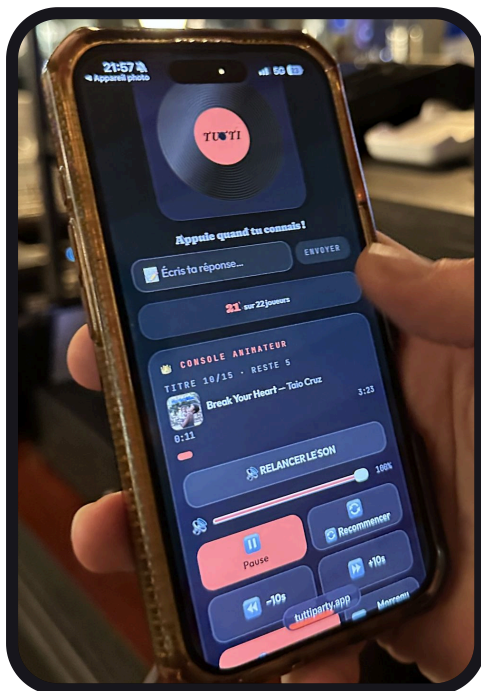

On the iPad or computer: **Reveal answer**, **Next track**, **Restart**, **Restart sound**, **Lyrics**, **End the round**, **End the blind test**. On the right: the round programme, the players (-5 / +5 / +10 to fix points) and the leaderboard.

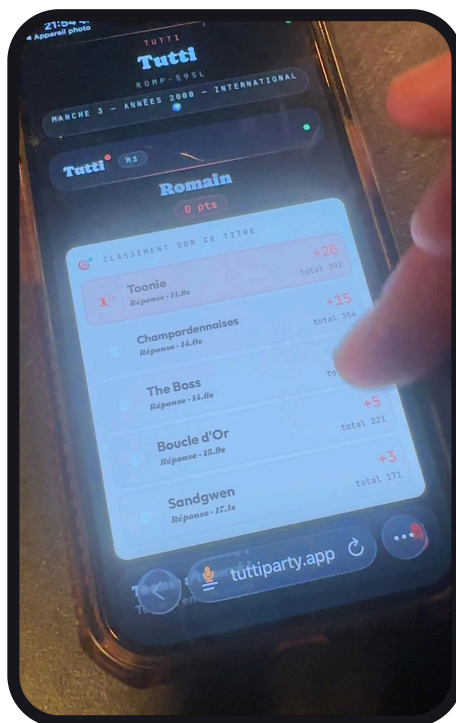

The console during a track.

The console on the host's phone

The host can run everything from their pocket: **Pause**, **Restart**, **-10 s / +10 s**, volume, **Restart sound**, **Reveal**, **Next track**, **Adjust points**, **End round**, **End the game**.

Real photo: the host console on a phone.

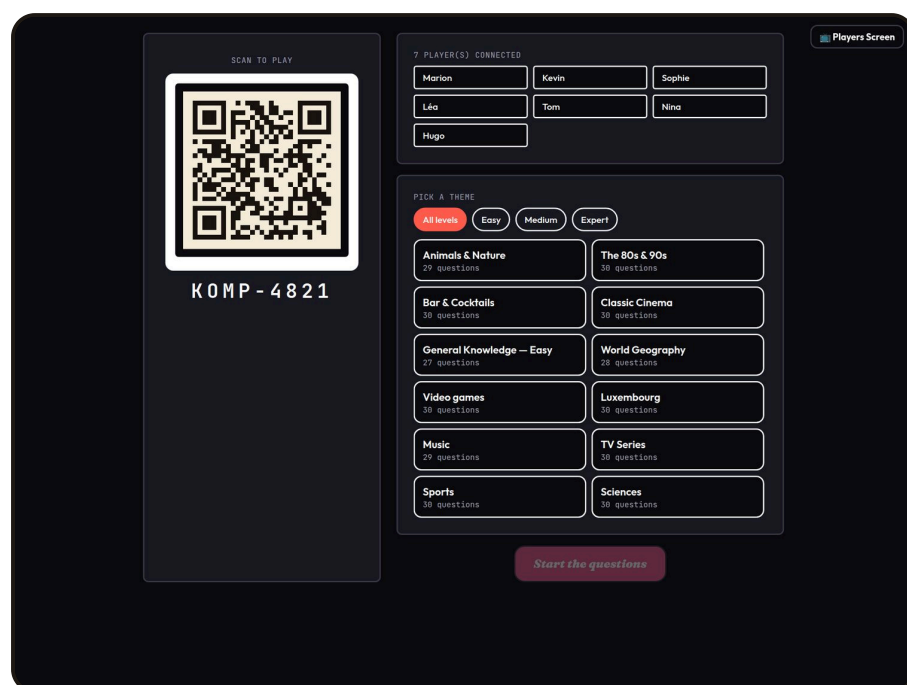

The ranking for the track.

No sound? Tap **Restart sound**. If a track really won't start, go to the **Next track**.

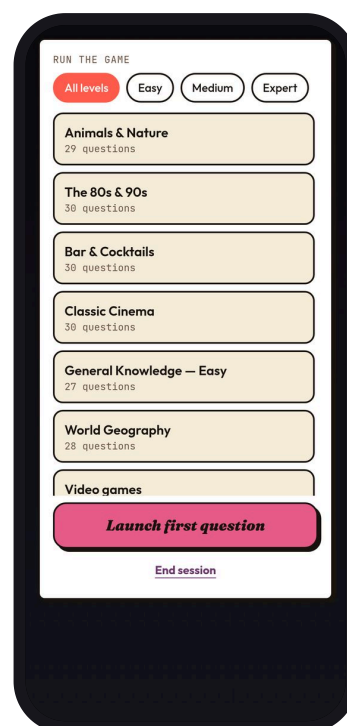

8. The quiz

The quiz runs **individually**. Everyone answers on their own phone and scores for themselves. Players who want to play together gather around a single phone.

Pick a level (All levels, Easy, Medium, Expert) then one of the 27 themes: **15 questions** are added to the game. Question types: multiple choice, true/false, free text, estimate.

The quiz console: QR code, players and theme picker.

In "Everyone plays" mode, themes are picked from the phone.

Each question lasts **15 seconds**. The answer is revealed when time is up, as soon as everyone has answered, or when the animator taps **Reveal now**. Then **Next question**.

What is the capital of Australia?

A Sydney

B Canberra

C Melbourne

D Perth

The question on the TV.

#4 MCQ WORLD GEOGRAPHY 100 pts

What is the capital of Australia?

A Sydney

B Canberra ✓

C Melbourne

D Perth

QUESTION RESULTS

1. Marion	Canberra	+100
2. Sophie	Canberra	+80
3. Kevin	Sydney	0

LEADERBOARD

Players Screen

1. Marion	380
2. Sophie	290
3. Kevin	170

Add a theme

End session

Answer revealed

Next question

Console side: results and leaderboard.

End of the round: add another theme (questions already asked that night don't come back) or tap **End session**.

9. Background music

While players scan the QR code, between rounds and while you pick the playlist, the console can play **your own Apple Music playlist**. It stops on its own when the game track starts.

- 1 In the menu, open **Settings**, section **Lobby background music**.
- 2 In **Apple Music playlist**, paste your playlist's share link (or its pl.u-... ID). Tick **Shuffle** if you like.
- 3 Leave it empty to use Tutti's built-in loop.

Your playlist plays on the iPad with the Tutti app and Apple Music. Elsewhere, the built-in loop plays.

10. End the night

Tap **End the blind test** (or **End session** for the quiz). The final podium shows on the TV and **stays there until you close it** with × **Fermer le classement** (close the leaderboard).

Checklist

- ☐ Account created, slot paid or free
- ☐ Start button active 30 min before
- ☐ Console connected to the speaker
- ☐ TV connected (second screen, QR code or room code)
- ☐ The right mode and roles (Animator + only for someone who isn't playing)
- ☐ Microphone allowed on phones if the game is voice
- ☐ Nicknames showing on the TV
